JOB DETAILS main entrance, interior when coming in - opens intermittently, occasionally slips the gear, check the exterior door while we are there too

COMPLETION NOTES Horton 4K RHO 14- tooth, dual controls and operators I arrived on site and checked in with Dave verbally. On arrival I found the interior right side door was not opening. During the inspection of the control, control power supply and operator. I found the power supply and control are good but the operator was the issue. I then contacted tech support to confirm my findings. I will fill out a field report for replacement equipment and the office will submit a proposal.
